

My name is Samuel Gómez, I am married to Yoselin and I have 2 children, Angie and Set. I am the leader of the Appropriate Technology ministry site since December of 2021. At this site we are preparing youth and adults three times a week in the area of carpentry, welding and combinations with glass. Carrying out theoretical classes and practical activities where they can demonstrate their performance and learned knowledge.

Our mission is to be a technical school where participants can learn a job and thus be able to be independent in the future. Leading the development for their family, community and that they can be transformed into the likeness of Jesus Christ through our weekly devotionals.
